

**WHETHER IT'S AN EMERGENCY OR A PLANNED EVENT,  
WE ARE YOUR ONE SOURCE:**

Whether it's extra cooling needed during extreme weather conditions or a short-term replacement following an emergency, businesses sometimes require equipment to cool, heat, or power an indoor environment on a temporary basis.

We can do that and more, delivering fast, reliable, and cost-effective solutions when you need them.

A temporary system can keep your business operational while you repair, replace, or upgrade your existing system.

We provide scalable cooling, heating, power, and compressed air for unique applications, emergency situations, and special events. Call us, and in no time at all, we can set up, install, and operate equipment for your requirements—indoor or outdoor, short or long-term, large project or small.

Our experienced team of account managers, engineers, service technicians, and logistics professionals can rapidly transform the equipment you need into a smoothly functioning system that will exceed your expectations.

**WE'RE HERE WHEN YOU NEED US.**

**SHORT ON TIME:**

A temporary system allows you to continue your business operations while you take the time to find the best permanent solution.

**SHORT ON FUNDS:**

Capital improvement budgets continue to shrink. A rental from HRS allows you to use funds from your operating budget to accomplish the same objective.

**PLANNING AHEAD:**

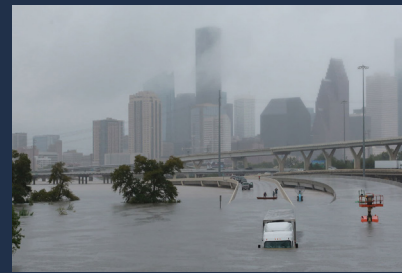

Knowing when and where temporary solutions are available can speed time of deployment in an emergency and limit associated financial losses.

**AT PEAK CAPACITY:**

A rental is a cost-effective solution for a short-term situation, such as a spike in production that lasts two months or less.

**FULL SERVICE SOLUTIONS:**

Choose from our wide scope of specialized capabilities when they're needed. Contact us for more information.

**EMERGENCY SERVICES**

Flooding, record-high heat waves, hurricanes, ice storms - the climate in Texas can be pretty unpredictable. When the unexpected happens, our extensive network and team of experts enable us to quickly provide solutions that get you and your business up and running in no time at all. We operate 24/7, rain or shine, so that you can focus on your business. During Hurricane Harvey our technicians waded through flood waters to help our customers. Mother Nature can bring it, but we can handle it.

**CONTINGENCY PLANNING**

**One Call + Plan = Minimum Interruption**

We offer contingency planning that covers all your utility needs - HVAC, power, and air. Implementing a plan that will identify the building's critical or essential needs will help streamline the utilization of equipment and personnel used to mitigate any unforeseen risk that could interrupt your fiduciary responsibilities. For customers with multiple sites, the plan will identify each location and building along with its specific tonnage of cooling and power requirements, as well as connection points to minimize the risk of an unplanned outage. This approach will allow us to deliver the best equipment accessories for that specific situation. At the end of the day, peace of mind is priceless.

**EQUIPMENT RENTALIZATION CAPABILITES**

We offer equipment to rent and can perform major repairs. We have a state of the art testing facility that we can test your equipment right then and there.

**LEASE-TO-OWN RENTAL OPTIONS**

We are here when you need us, and our lease-to-own options let you focus on the solution, not the expense. Contact our team for more information!

## POWER • HVAC • AIR

**COMMON RENTAL APPLICATIONS**

**POWER • HVAC • AIR**

**EMERGENCY**

When the unexpected happens, our extensive network of rental depots and service centers enable us to quickly provide power and HVAC equipment on site to help you recover as soon as possible.

**PLANNED SHUTDOWN**

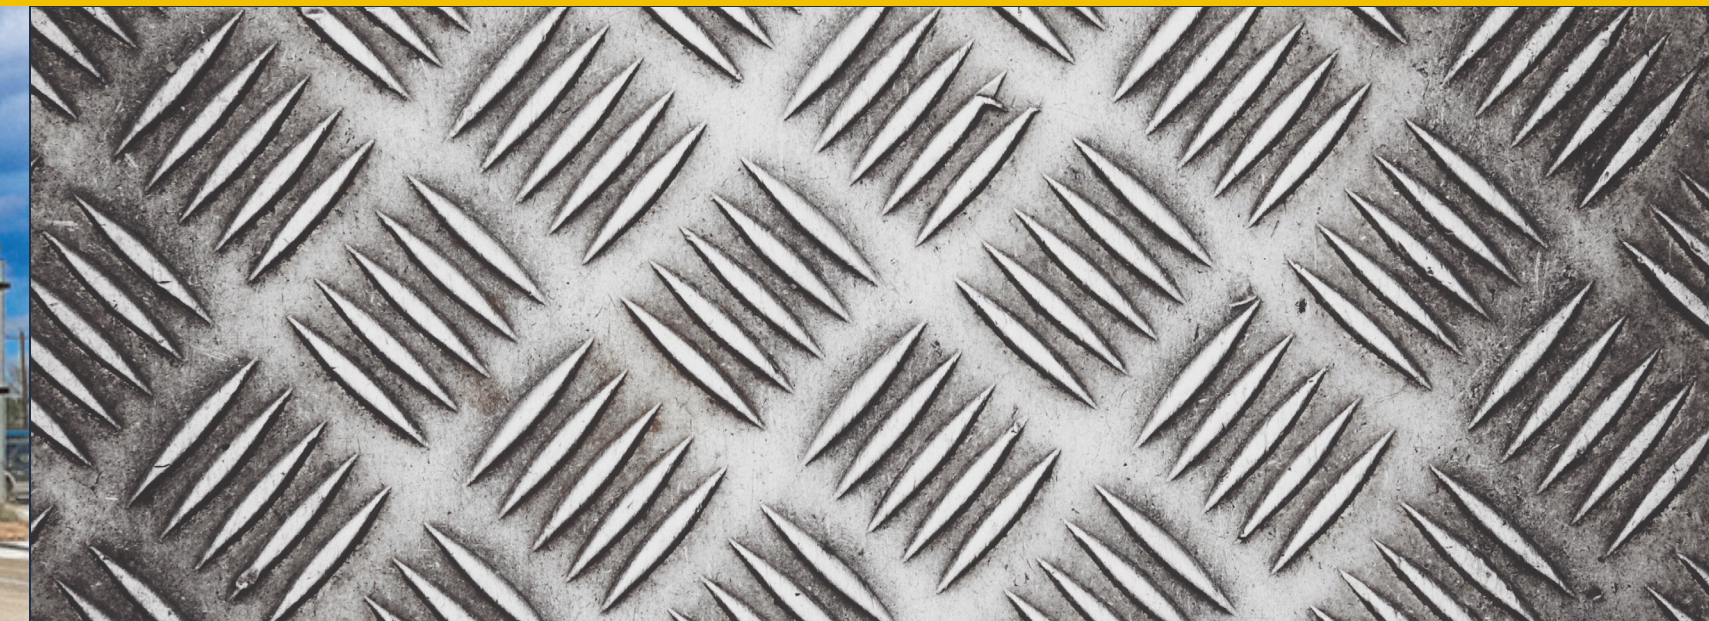

Sometimes, a shutdown of HVAC, power and/or compressed air equipment is necessary in order to conduct planned maintenance or make major renovations. Temporary equipment can help you maintain normal operations during this period.

**SEASONAL**

Special circumstances may demand power, heating/cooling, or compressed air beyond the capacity of your facility's existing equipment. Temporary supplemental equipment can fulfill these requirements in a cost-effective manner.

**SPECIAL EVENTS**

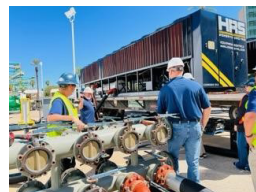

Specialized situations and environments call for specialized equipment. We have the temporary solutions you need to support your golf tournament, harvesting, ice rink, festival, concert or any other special event.

## AIR-COOLED CHILLERS

Air-cooled chillers are ideal when speed, ease of installation, and reliability are all priorities.

- Equipped to provide quick restoration of cooling in emergencies or planned situations
- Great for all markets to provide cooling for both process and comfort applications

Available Products:

- 10-500 ton / 480V
- Integrated pumps on most models
- Leaving water temperature range of 0-65° F

## WATER-COOLED CHILLERS

Modified for easy installation to provide fast, temporary backup or added capacity in an energy efficient manner.

- Ideal for large process and comfort cooling applications that require higher efficiency equipment
- Weatherized for outdoor use
- Larger tonnage in a smaller footprint

Available Products:

- 225-1,000 ton / 480V & 4,160V models available
- Units are weatherized for outdoor use
- Starters are unit mounted

## VERTICAL UNITS

Designed to meet the specific needs associated with heating and cooling for outdoor and special events.

- Designed for integrated cooling and heating
- Optimized for minimal noise output and footprint
- Modified for rental with cam lock connections and four-way forklift skid
- Simplified controls for ease of operation
- Capable of producing heated or chilled air

Available Products:

- 10-30 ton

## SPOT COOLERS

Portable A/C units can do more than just cool- they can also dry wet areas and protect equipment from water and humidity.

- Maintenance-free operation
- Totally self contained
- No costly installation necessary
- Ideal for server rooms, laboratories, and other small to medium sized spaces

Available Products:

- 1-5 ton

## DEHUMIDIFICATION

Dehumidification Units (DHU) are highly efficient at providing clean, dehumidified air with minimal electrical power required.

- Duct collars on the supply and return enable quick-tie-in to the building system
- Post cooling coil allows you to control the returning air temperature into the space

Available Products:

- 5,000 cfm desiccant dehumidifiers

## COOLING TOWERS

Our line of cooling towers can be rented as standalone units or paired when water applications are needed.

- Provide the cooling for water-cooled chillers and can be used directly in process and manufacturing cooling applications
- Temporarily replace a tower that has gone down

Available Products:

- 250, 270, 500, and 750 ton units

## HEAT EXCHANGERS

Our heat exchangers are plate-and-frame type and provide fluid-to-fluid heat exchange in chilled/hot water applications.

- Provide the cooling for water-cooled chillers and can be used directly in some process cooling and manufacturing applications
- Allow transfer from one cooling method to another

Available Products:

- 100-500 tons
- Modified for indoor or outdoor use

## GENERATORS

Whether you need to power one of our temporary cooling solutions or just need additional power, we have options ranging from 20 kW to 2,000 kW.

- Cam-type electrical connections
- Forklift compatible
- Larger units can be set up in parallel to provide additional power solutions

Available Products:

- 20 kW - 2,000 kW

## ELECTRIC HEATERS

Electric heaters provide clean, electric heat that is free from the moisture and fumes associated with other types of heating.

- Cam-type electrical connections
- Forklift compatible
- Flex duct connections

Available Products:

- 50 kW & 150 kW electric heater
- Capable of 170,000 to 512,000 Btu/h

## ANCILLARY

In addition to a wide selection of rental solutions, we also have all the accessories needed to get your equipment up and running quickly.

- Provide complete temporary solutions
- Help us tailor solutions to your specific needs
- Switchable between natural gas and propane

Available Products:

- Pumps, transformers, power distribution, flex hose, electrical cables, flex ducts, trailers, and more

## AIR HANDLERS

Custom engineered air handlers are the perfect solution for larger jobs and are outdoor rated and sized for 100% outside air.

- Turn cold water into cold air
- Ideal for providing air conditioning to very large warehouses, tents, or other facilities
- Low temperature 30-ton Krack units also available

Available Products:

- 5,000cfm, 10,000cfm, 20,000cfm, and 25,000cfm

## AIR CONDITIONERS

These state-of-the-art packaged rooftop air conditioning units provide quiet and efficient temperature control and are modified to be lifted by crane or forklift.

- Quickest and easiest source of temporary cold air
- Restore cooling in an emergency or cool a previously unconditioned space
- Convenient for special venues & outdoor sporting events
- High-static 35 and 50-ton units available

Available Products:

- 5 ton-80 ton

## COMPRESSED AIR

We offer ISO Class 0 Certified rotary screw oil-free air compressors to supply pure air for critical environments.

- Available for planned or emergency shutdowns
- Easy installation
- Professionally maintained for optimum performance
- Various pressures available (65 -140 psig)
- Components available to dry & filter compressed air

Available Products:

- 200-400 hp oil-free rotary screw air compressors

## INDUSTRIAL SERVICES

We help our industrial customers reduce plant downtime and increase profitability by utilizing our fleet of critical utility solutions.

- Emergency response for unplanned equipment or system failure
- Additional capacity due to seasonal limitations
- Planned outages
- Production area dehumidification and cooling
- Dense air intake cooling
- De-bottlenecking critical path process
- Augmenting existing equipment
- Mechanical repairs and rebuilds - OEM (Trane), York, FES, Frick, Carrier, Vilters, and Absorbers
- Service and service agreements
- Upgrades and retrofits
- Lease-to-own of new equipment

## SUPERIOR SUPPORT

- Fully insured and licensed: TACLA009290C, MPL 38267
- \$10 million bonding capacity
- Multiple financing sources
- 120+ service technicians
- Dedicated HSE team for safety

## MODIFIED FOR EVERY APPLICATION

Our equipment is modified for easy installation and operation.

- Integrated lifting frame for overhead crane or forklift
- Altered for quick connects
- Shore power

## ADVANCED TECHNOLOGY

We provide the same advanced equipment that has made Trane the leader in HVAC applications.

- Latest models with annual fleet updates
- Compatibility with building control systems
- Remote monitoring capabilities
- Equipment undergoes regular run testing and full maintenance options to help prevent downtime
