

# HURRICANE SEASON ARE YOU PREPARED?

## PLAN AHEAD

The Gulf Coast is no stranger to unpredictable weather patterns and severe storm activity. We offer a selection of contingency plans aimed at ensuring you are prepared for any natural disaster. Through a detailed and collaborative process, we can customize a plan to fit your facility's unique needs so you can quickly get back to normal operations following a weather event. Having a plan in place ensures guaranteed availability of equipment without paying sky-high emergency rental rates.

## GET BACK TO BUSINESS

Our technicians have waded through flood waters to provide critical assistance to our customers to get them back up and running. They have weathered freezing temperatures to provide power to local businesses during ice storms. We are committed to helping our community in every way possible. Whether it's extra cooling needed during extreme weather conditions or a short-term replacement following an emergency, businesses sometimes require equipment to cool, heat, or power an indoor environment on a temporary basis. HRS can do just that and more, delivering fast, reliable, and cost-effective solutions when you need them.

### CONTINGENCY PLANNING

Our contingency plans cover all your utility needs- HVAC, power, compressed air, and dehumidification. For businesses with multiple sites/facilities, our plans can encompass each location with its specific tonnage of cooling, power requirements, and connection points to minimize an unplanned outage.

### EMERGENCY SERVICES

Flooding, record-high heat waves, hurricanes, ice storms – the climate in the Gulf Coast region can be unpredictable. Our technicians and extensive network of rental depots enable us to quickly provide power, HVAC, compressed air, and dehumidification equipment on site to help you recover as soon as possible. Mother Nature will bring it, but we can handle it.

### EQUIPMENT RENTALS

HRS provides scalable cooling, heating, power, and compressed air for unique applications, emergency situations, and special events. Call us, and in no time at all, we can set up, install, and operate equipment for your requirements — indoor or outdoor, short or long-term, large project or small.

# ONE CALL + ONE SOURCE = MINIMUM INTERRUPTION

## GENERATORS

Whether you need to power one of our temporary cooling solutions, need additional power to compensate for increased load, or need temporary power following an emergency or weather event, we have options ranging from 36 kW to 1.5 MW.

- Cam-type electrical connections
- Forklift compatible
- Larger units can be set up in parallel to provide additional power solutions

## HVAC

We can provide scalable, temporary cooling and heating based on your need and required application.

- Air-cooled chillers from 10 T - 500 T
- Water-cooled chillers up to 1,000 T
- Package units from 5 T - 80 T
- Spot coolers, air scrubbers, portable dehumidifiers

## POWER DISTRIBUTION

Weatherized for outdoor use, we offer a wide variety of power distribution equipment to support all units in most situations. From cables to distribution boxes, we can provide a solution to your needs.

- Quad string cables
- 20A and 50A extensions
- Spider boxes
- Transformers

## COMPRESSED AIR

We offer ISO Class 0 Certified rotary screw oil-free air compressors to supply pure air for critical environments. Our units are available for planned or emergency shutdowns and are easy to install. We professionally maintain your temporary equipment to ensure optimum performance. Components are also available to dry and filter compressed air.

- 200-400 hp oil-free rotary screw air compressors
- Various pressures available (65-140 psig)
- 800 and 1500 cfm air dryers

## ANCILLARY PRODUCTS

In addition to a wide selection of rental equipment, we also have all the accessories needed to get your equipment up and running quickly.

- Switchable between natural gas and propane
- Pumps, transformers, power distribution, flex hose, electrical cables, flex duct, trailers
